PROJECTS

NOTES APPLICATION

Creates a notes application using React.js that allows users to create, edit and delete notes and to-dos. Integrated local storage to save notes persistently.

[https://github.com/Sarfoclinto/Notes-Typescript.git]

SHORT-TERM JOB PLATFORM

Developed a web platform to manage short-term job listings and applications using React.js. Implemented features such as job posting and user authentication.

EDUCATION

GENERAL SCIENCE – PREMPEH COLLGE

I graduated with final grades of 4As and 4Bs. During my time in high school, I held several leadership positions, including Head of Research for the school's Debate Team, Private Officer to the Cadet team and an Evangelism Coordinator to the hostels.

SOFTWARE ENGINEERING – INTERCOM PROGRAMMING AND MANUFACTURING COMPANY

I enrolled into IPMC in November 2023 and has completed the following modules so far: C++, HTML, CSS, JavaScript, MS SQL Server and Core Java. I stand in for my class as their representative. I am a self-taught React.js developer.

EXPERIENCE

Open-Source Contributor

Platform Name: GitHub, Stack Overflow

January 2023 – Present

Contributed to various open-source projects by submitting pull requests, fixing bugs and adding new features. I Actively participated in community discussions, answered technical questions and provided support to issues related to web development other developers

EXPERIENCE

Software Developer Intern

Platform Name: Peadato Limited Company,

Specification: Frontend Developer (React)

October 2024 – November 2024

As a software developer intern at Peadato, I contributed by working on various projects to develop and enhance software solutions for clients. I assisted in coding, debugging, and testing applications, ensuring they met user requirements and functioned smoothly. Additionally, I collaborated with senior developers to optimize system performance and improve user interfaces. My internship experience allowed me to apply my programming skills in real-world scenarios, further developing my problem-solving abilities and gaining hands-on knowledge of the software development process.

Software Developer Intern

Platform Name: Clockwise Technology,

Specification: Software Developer (C# and Blazor)

November 2024 – December 2024

While interning as a software developer at an IT services company, I played a key role in developing and optimizing software applications. I contributed to coding, troubleshooting, and implementing new features that improved user experience and system efficiency. Working closely with the development team, I assisted in streamlining processes, enhancing functionality, and ensuring the delivery of high-quality solutions on time. This experience helped refine my technical skills while gaining valuable insights into the software development lifecycle.
